"At the Sign of the Camera"

We want you
RADIO HAMS
to know about
WILLOUGHBYS

It's our belief that people who are enthusiastic about radio, are also enthusiastic about photography. We're that way ourselves.

Here in an ultra modern setting we have assembled one of the finest and most extensive collection of cameras and camera supplies in the world.

Our organization is a co-operative one and is owned by the co-workers. The founder is also an OT radio ham. You'll find his QRA in this book under W-2-RT. He has asked us to say to you that in addition to the regular Willoughby guarantee of a square deal to all, he wants you to have his own personal guarantee.

We exchange cameras, lenses and things photographic. Get in touch with us.

TRIMM COMMERCIAL HEADSET

*Designed Especially
for the
Discriminating*

AMATEUR

Lightweight—Ultra-sensitive. The finest available in a high quality phone. Supplied with an extra rugged leather covered headband, thereby assuring the wearer of the greatest comfort.

Besides its exceptional sensitivity to weak signals, the TRIMM Commercial can reproduce very intense sounds without appreciable distortion; as loud as an acoustic signal of plus 135 Db., louder than the ear can stand.

These phones are unconditionally guaranteed against breakage or failure for a period of three years from date of purchase. This guarantee alone gives proof of their worth.

It is obvious that such a headset cannot be constructed cheap enough for ordinary use; but by this very token they are a mark of distinction for the amateurs they serve.

MEISSNER Signal Shifter

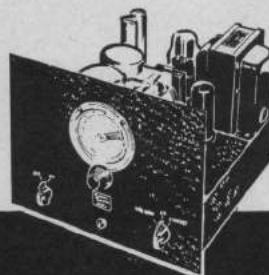

It's a variable-frequency electron-coupled exciter unit that makes it easy to slide your signal into "holes" in the band for 100% QSO's—by remote control if you wish. Single dial control, too, with oscillator and buffer stages ganged together.

It has unbelievable frequency stability (superior to many crystals) with uniform output over entire tuning range. Plenty of sock to drive your medium power final or RF Amplifier.

Operates on 10, 20, 40, 80 and 160 meter bands with just 5 sets of coils, three to a set. Has built-in power supply for 110 volts 60 cycles, and uses one each 6F6, 6L6 and 80 tubes.

It's COMPLETE (less only tubes and coils). Coils are \$2.50 NET each set. And it's YOURS for

OHMITE DEPENDABILITY IN NEW "PITC" RIG

Pitcairn Island, romantic scene of "Mutiny on the Bounty," a tiny dot in the Pacific thousand of miles from nowhere, will now have its first really efficient radio transmitter. Seldom visited by passing ships, "PITC" will rely exclusively on this transmitter for outside contact. Since components must not fail, even under adverse tropical conditions, OHMITE Resistors, Rheostats and Band-Switches were the choice of the designing engineers.

You may not *have* to depend on radio alone for vital contacts with the outside world—but you *can* depend on the proper Ohmite units to solve your radio resistance problems once and for all—surely, economically, conveniently. Do the job *right* with OHMITE!

This book is of great value to you, and it costs you nothing. A postal will bring it to you.

To Read Code at High Speeds Like You Read Print

If you've practiced and practiced with any kind of practice set, but can't get over the "hump" that seems to be your limit—don't be discouraged. Thousands of skilled operators have had the same experience. Some thought they were dumb; others thought they weren't "gifted." But you should see those fellows today! They can send beautiful code and copy fast press 4 to 8 words behind without conscious effort or strain. Those fellows have *Automatic Sound Consciousness*—and they got it through CANDLER Training!

No Expensive Practice Sets Needed for Candler Training

Learning to Send and Receive Code Rapidly, skilfully is a Mental Process that requires Mind Training such as only CANDLER can give you. Practice of any kind without this Specialized Training is like trying to learn electricity without a knowledge of *Ohm's Law*. CANDLER shows you the easy, interesting way to Speed, Skill, and that Amateur or Commercial License in half the usual time.

WALTER H. CANDLER Maker of Champions Will Train You Personally to Qualify for that Bigger, Better Job.

L. R. McDONALD, W8CW Winner A.R.R.L. Code Contest Detroit Convention Sept. 6, 1937 by copying 60 wpm without error. "Practice alone of any kind will not develop a fast op. ASK YOUR JOBBER FOR BIRNBACH INSULATORS

Many leading engineers, when they lay out their rigs, specify Birnbach Insulators because of their superiority. They know from experience that Birnbach provides a full range of heights for every purpose; they know that they are designed for greater strength; that they are highly vitrified and have low absorption characteristics. In every instance, Birnbach Insulators are built up to a standard—not down to a price. Yet, despite their superiority, Birnbach Insulators cost no more!

Whether you need Standoff Insulators, Cone Standoff Insulators, or Feedthru Insulators—ask your Jobber for **Birnbach Insulators** by name. Practically every jobber in the country (and most of those advertising in this magazine) has them in stock!

Stocked by outstanding jobbers in your locality, you'll find in the AEROVOX line every type, capacity and voltage capacitor you may require for transmitting and receiving applications. Also essential wire-wound and carbon type resistors.

It pays to standardize on AEROVOX. For these capacitors and resistors carry the same brand name, backing and performance standards as those in daily use in leading radio sets, electric refrigerators and other assemblies. 'Nuf sed!

Ask for DATA . . .

Your nearest AEROVOX jobber has a new catalog of our transmitting capacitors and resistors. Or if you prefer, write us direct.

THE 510X FREQUENCY EXPANDER by RME

STRIKING A NEW NOTE

In the adaptation of improved methods toward ultra high frequency reception, the 510X Frequency Expander is being introduced.

Far reaching in design and application, this new unit will be the answer to many problems in a frequency range which has many possibilities. We have reasons to believe that the experimental work to be carried on in our own 56 to 60 megacycle band will produce data and results which will write a new chapter in amateur radio.

Here are some of the 510X features:

Frequency coverage continuous from 27.8 to 70 megacycles in three bands. Twenty-one inches of tuning scale to cover the frequency range.

A sensitivity of considerably less than one microvolt when used in conjunction with the RME-69 Receiver. Selectivity—same as RME-69 Receiver.

Completely shielded and equipped with by-pass switch to remove instrument from antenna circuit when receiver is used for regular low frequency reception.

Self-contained power supply, not depending on the RME-69 power supply.

Improved operation on ten meters when used in conjunction with the RME-69, or any other modern super heterodyne receiver.

Image frequency ratio 750 : 1 at 60 megacycles, 2750 : 1 at 45 megacycles, 10,000 : 1 at 39 megacycles.

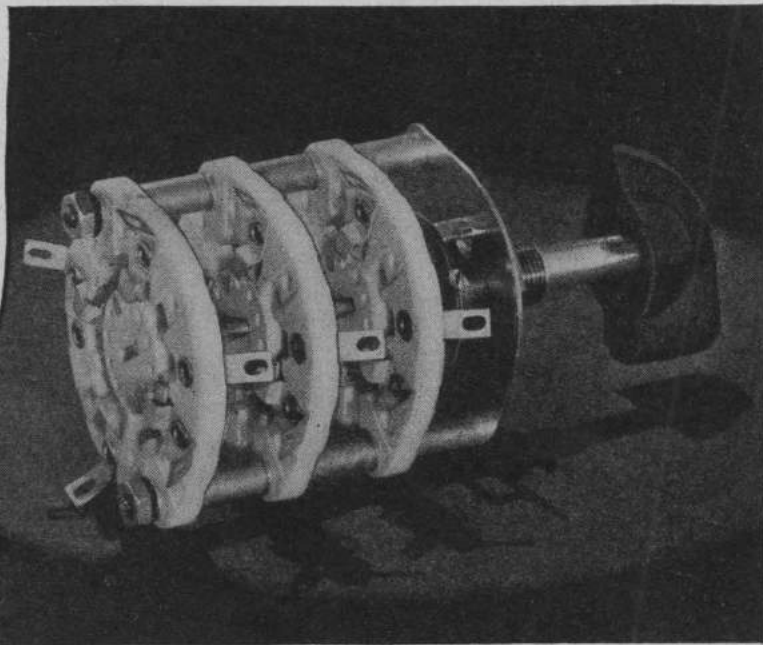

Fully calibrated tuning control same as used on RME-69 and DB-20, combining loaded gear and planetary combination drive.

Input circuit designed so that either single wire Marconi type antenna or one of the doublet types may be used.

Mr. Willis Le Bouef,
Jefferson Electric Co.,
Bellwood, Illinois.

Dear Mr. Le Bouef:

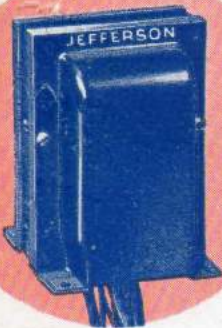

I have been using Jefferson Transformers for about one year and a half. In our humid climate we experienced a great deal of trouble with transformers of all types, but the first Jefferson Transformer that was used by me are still giving satisfactory service, and this is the reason that I used Jeffersons on the expensive installation illustrated below.

Mr. William G. Zetmann, president of the Zets 7 Up Bottling Company has personally complimented me on the tone of the 60-watt amplifier built for them. If it were not for the fact that I used hi-grade transformers, I would not have received this and many other compliments.

Yours very truly,
G. A. Gitz

Gentlemen:

I have used transformers of various makes, among them two Jeffersons. The results with Jeffersons were so satisfactory that I decided to use them throughout. Immediately my R reports increased considerably. As no other changes were made, I attributed this increase to the high quality and workmanship of your transformers.

JEFFERSON TRANSFORMERS"**

Jefferson Electric Co.,
Bellwood, Ill.

Gentlemen:

I am sending you a picture of a 120-watt amplifier built from a diagram you issued some time ago and using your products. The amplifier has been built for some time and I want to tell you that I'm proud to be the owner of it and haven't seen anything that will compare with it.

The top rack has a tone control monitor speaker and monitor control. The second rack has four input channels with controls for two or four slices, a fader master volume and a frequency control or compensation built like the suspension compensator. The third rack has two milliammeters and a meter for the line current. The third panel has three switches, a master switch filament and plate voltage switch. The output is so that 50, 200, 500 or 1250 ohm lines can be hooked up to it.

Sincerely yours,
Ted Cover
